Mission

JTF-CS anticipates, plans, and prepares for Chemical, Biological, Radiological, and Nuclear Defense Support of Civil Authority (CBRN-DSCA) response operations. When directed, JTF-CS deploys within twenty-four hours of notification to command and control DOD forces and conducts CBRN response operations in support of civil authority response operations in order to save lives, prevent further injury, and provide temporary critical support to enable community recovery.
(approved by CDRARNORTH 9 October 2013)

JTF-CS

**BPT provide JPAC to JFLCC and NNC.
BPT conduct general DSCA or FCM
within the NC AOR.
*(USARNORTH OPORD 01-13)***

Chemical

Biological

Radiological

Nuclear

Area of Responsibility

JTF-CS provides CBRN planning, exercise, and response support within the U.S., its territories and possessions

Alaska

Hawaii *

Guam *

American Samoa *

Northern Marianas Islands *

Puerto Rico
Virgin Islands

Canada**

Mexico**

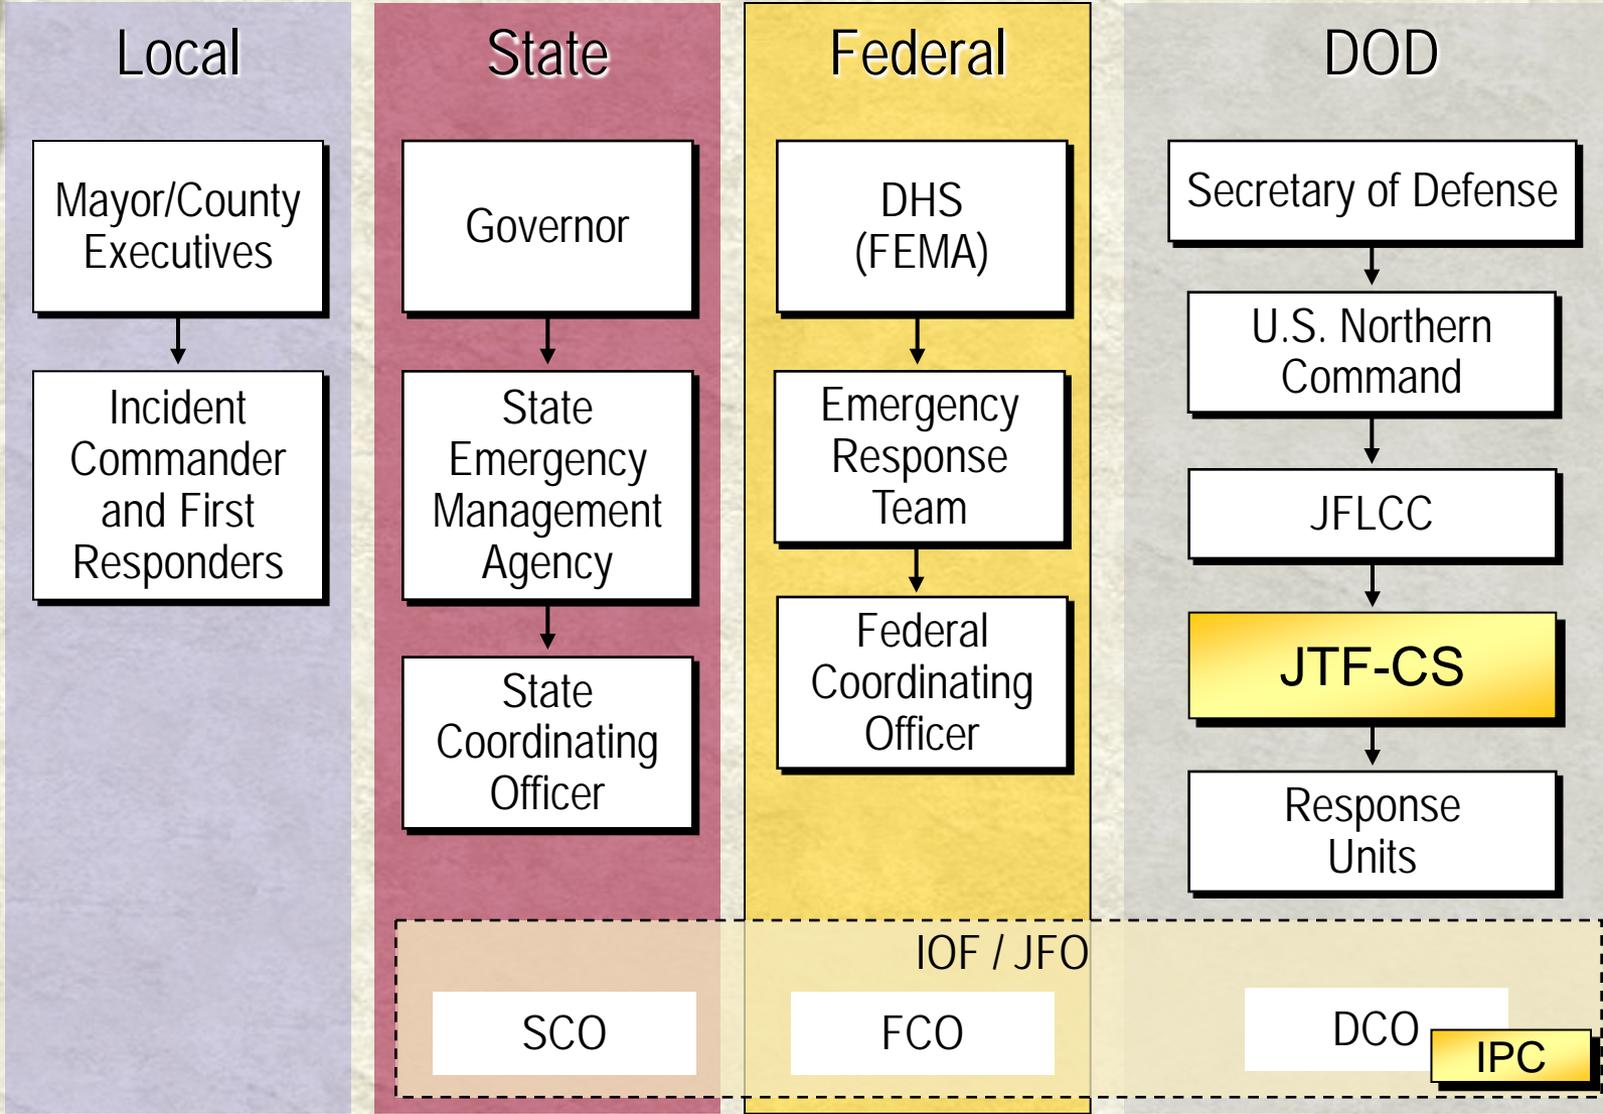

Bahamas**

*** JTF-CS may be OPCON to USPACOM when directed**
**** JTF-CS may support FCM if directed by NORTHCOM**

Capability Requirements Analysis

PLANNING SCENARIOS

Created for Use in National, Federal, State, and Local Homeland Security Preparedness Activities

The Homeland Security Council
February 2006

CBRN Response Scenarios

- 1: Nuclear Detonation – 10-Kiloton Improvised Nuclear Device
- 2: Biological Attack – Aerosol Anthrax
- 3: Biological Disease Outbreak – Pandemic Influenza
- 4: Biological Attack – Plague
- 5: Chemical Attack – Blister Agent
- 6: Chemical Attack – Toxic Industrial Chemicals
- 7: Chemical Attack – Nerve Agent
- 8: Chemical Attack – Chlorine Tank Explosion
- 11: Radiological Attack – Radiological Dispersal Devices

Scenarios highlight the scope, range, and complexity of catastrophic incidents

Capabilities

The **Target Capabilities List (TCL)** describes specific capabilities (and levels of capability) that federal, State, local, and tribal entities are expected to develop and maintain.

Tasks

The **Universal Task List (UTL)** is a menu of tasks that may be performed in major events such as those detailed in the National Planning Scenarios.

UTL and TCL link tasks to capability requirements

Plans quantify the DOD support estimates

National Response Framework

- NRF identifies DOD support functions.
- Mission analysis determines specified and implied tasks.

Deliberate Planning

- Bridge the NRF specified and implied support tasks to DOD capabilities
- Analyze CBRN Response resource requirements based on anticipated tasks

CBRN Response Enterprise Elements

State Response

Federal Response

State NG assets may operate under State or Federal control

DCRF Capabilities BnTF Concept

BnTF-1
O-5 CMD

Capabilities:

- HQ
- LNO Team
- RECON
- Tech and non-Tech Search & Rescue
- Mass Casualty Decon Triage/Stabilization
- MEDEVAC
- CASEVAC
- Forward Logistics Element
- Communications

BnTF-2
O-5 CMD

Capabilities:

- HQ
- LNO Team
- RECON
- Tech and non-Tech Search & Rescue
- Mass Casualty Decon Triage/Stabilization
- MEDEVAC
- CASEVAC
- Forward Logistics Element
- Communications

BnTF-3
O-5 CMD

Capabilities:

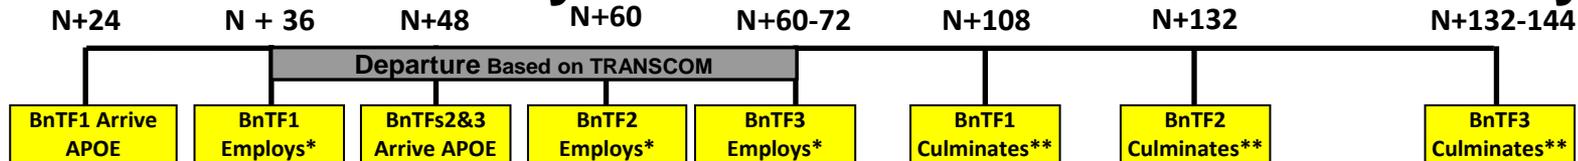

- HQ
- LNO Team
- RECON
- Tech and non-Tech Search & Rescue
- Mass Casualty Decon Triage/Stabilization
- MEDEVAC
- CASEVAC
- Forward Logistics Element
- Communications

Six Capabilities

- 1) Mission Command
- 2) Identification and Detection
- 3) Technical and Non-technical Search and Rescue
- 4) Mass Casualty and Non-Casualty Decontamination
- 5) Medical Triage and Stabilization
- 6) Air and Ground Evacuation (Medical and Non-medical)

HQs JTF-CS + DCRF = 5,400 personnel

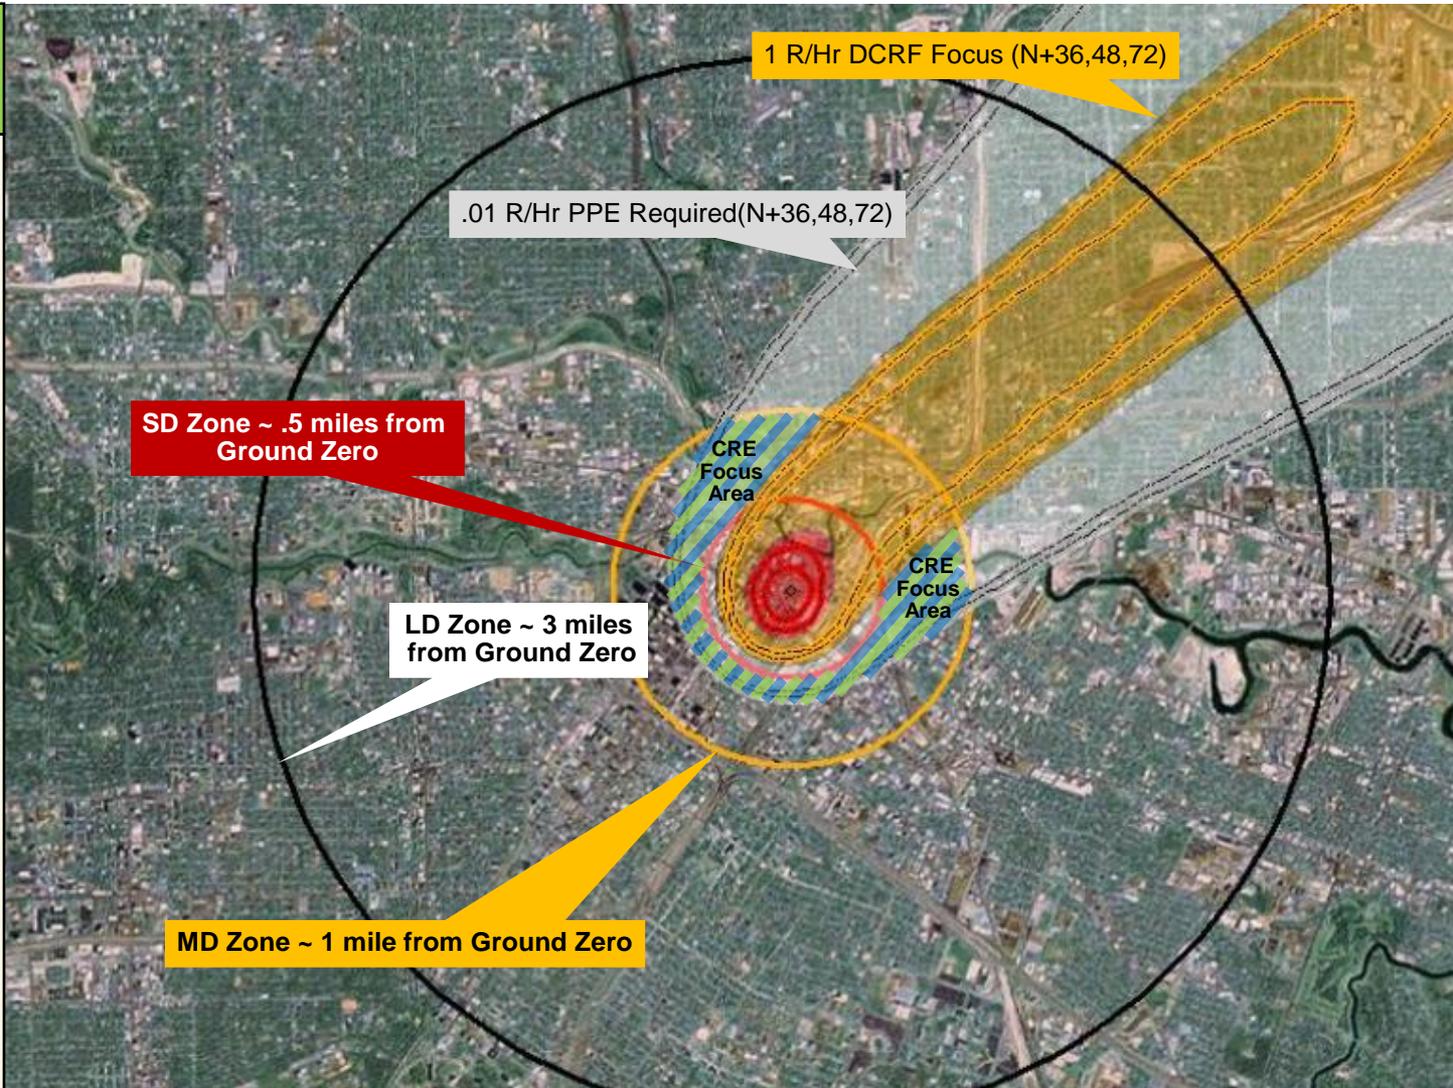

10 Kt Nudet Physical & Radiation Hazard Overlay

CONOPS: BnTFs respond to the CBRN Response Enterprise (CRE) Focus Area to employ CBRN specific capability within the areas depicted on the map by hash marks.

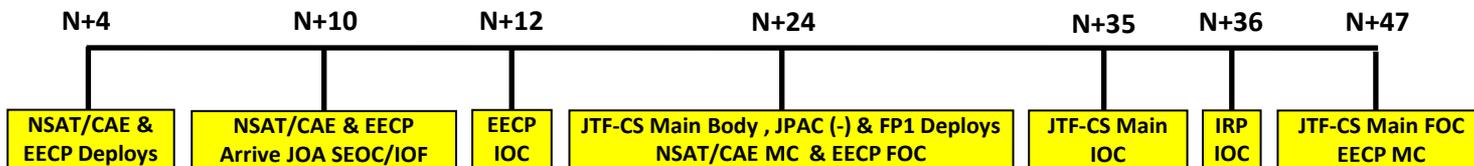

Mission: Save lives and minimize suffering within the CRE Focus Area.

- Any person within the Severe Damage Zone (.5 Miles from detonation point) were likely killed by the initial overpressure and radiation. Viable survivors within this region are highly unlikely and BnTFs while equipped and trained to enter this area should do so only to rescue known survivors *
- The area between the Severe Damage Zone and the Moderate Damage Zone will have moderate damage and represents greatest lifesaving opportunities
- The CRE Focus area (between 1R/Hr and .01 R/Hr in the MD Zone) will increase in size with time due to rapid radioactive decay. Search and rescue efforts in this area require specialized training, personal protective equipment and the ability to quickly provide decontamination and medical care for those recovered.
- The majority of survivors in the CRE focus area will be those who sheltered in place, are incapacitated or family members of those who are incapacitated
- BnTF's will work until culminated or all survivors have been cleared from their assigned area.

* Deployment times are a best estimate used for planning purposes and are heavily impacted by Multiple Factors
 ** If within Operational Exposure Guidance (OEG), then able to continue after Recovery & Reconstitution

DCRF Command & Control

Early Entry Command Post (EECP) Consists of NSAT, CMD GRP, C2 Team, APOD Team & BSI Team

CONOPS:
JTF-CS deploys NSAT, FCE, EECP and Main IAW N-Hour Sequence to conduct mission command of assigned forces.

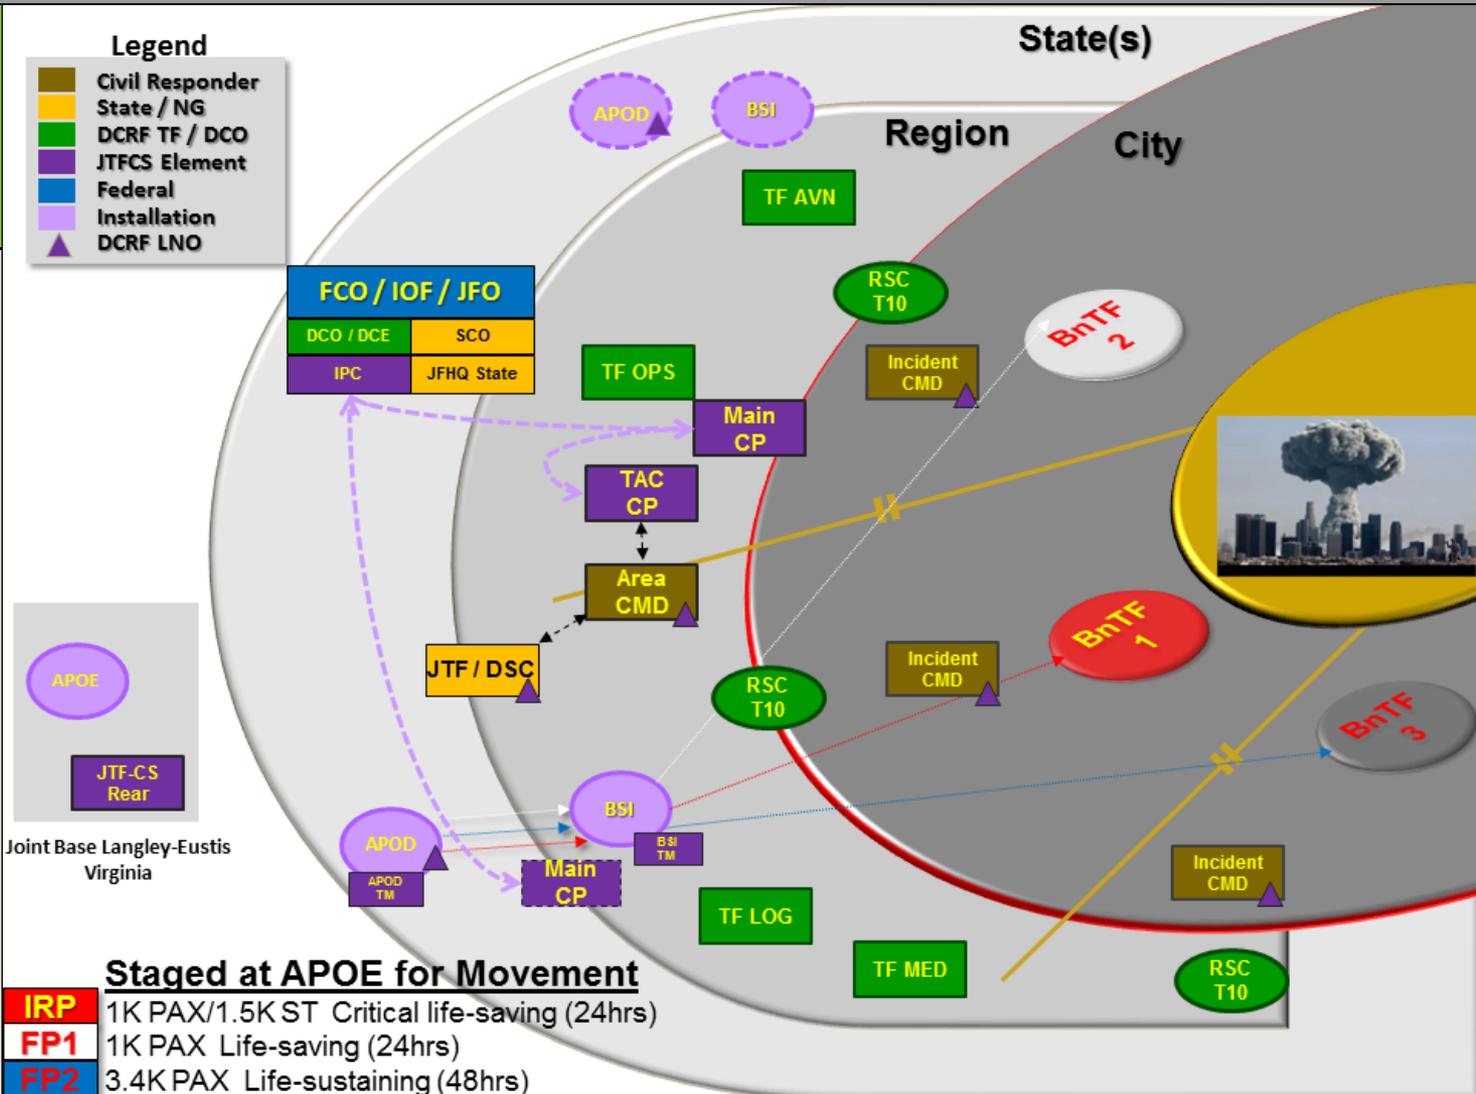

Mission: Save lives, minimize suffering and provide temporary critical support to enable community recovery.

- Conduct military operations through decentralized execution based on mission orders, CDRs Intent and overarching MAs for effective mission accomplishment

- Successful mission command results from subordinate leaders at all echelons exercising disciplined initiative within the commander's intent to accomplish missions

- Mission Command requires an environment of trust and mutual understanding—The art and science of integrating the warfighting functions and synchronizing forces to understand, visualize, design, describe, lead, assess, and adapt decentralized operations to accomplish the mission within the broad purpose of higher commanders' intent

- Mission command includes empowering the lowest possible echelon with appropriate capabilities, competency, and authority to seize, retain, and exploit the initiative

JTF-CS C2 During Phases of an Operation

Rapidly Deployable Mission Command Capability

Source: JTF-CS TACSOP

A bald eagle is perched on a ledge in the top left corner. Below it are three circular logos: the Northern Command logo, the U.S. Army South logo, and the U.S. Army Central logo.

Road to Readiness & Road to Response

- DCRF mission is unique and critical to national recovery after CBRN incident.
- DCRF units require similar “Road to Readiness” timeline as deploying forces.
- DCRF training timeline is non-standard, making the road to readiness more challenging.

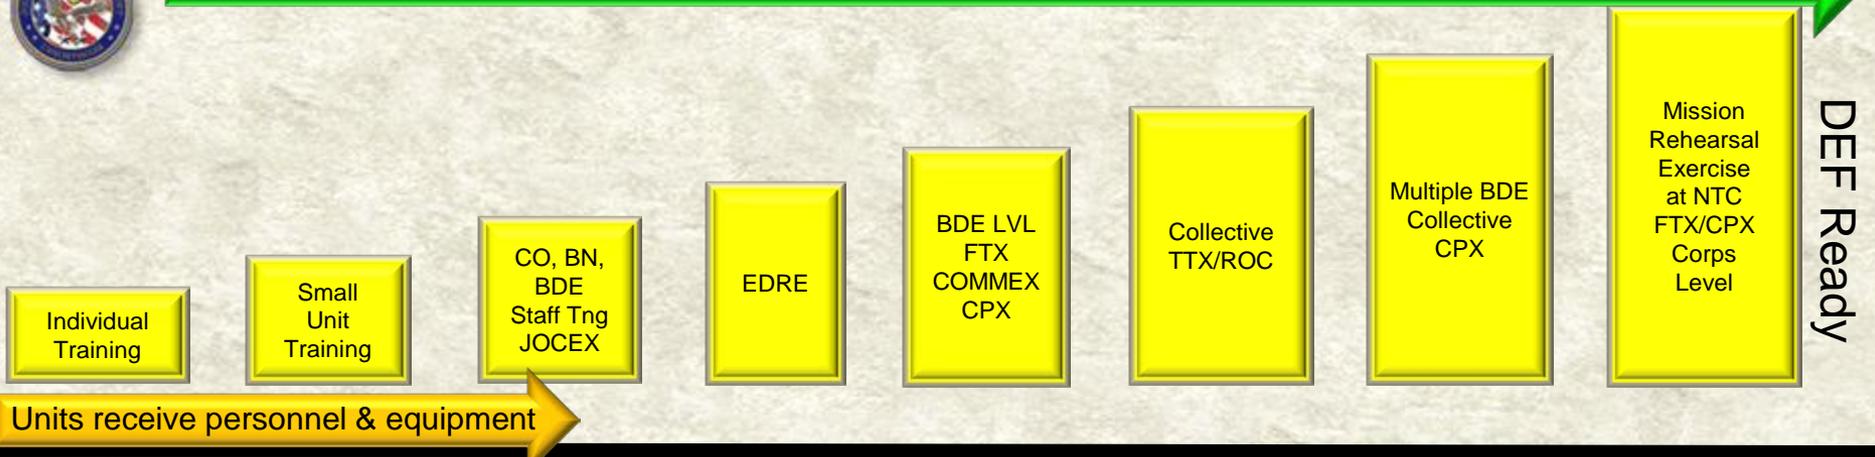

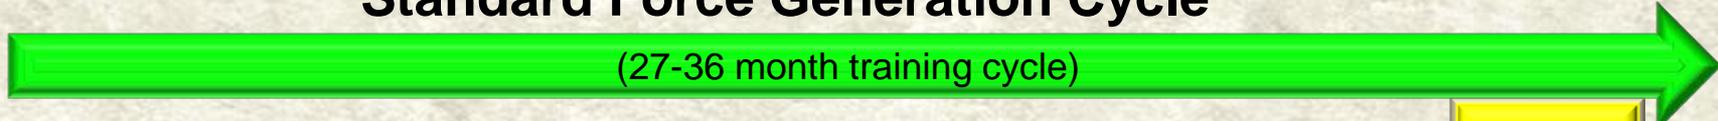

Current Authorities Hinder road to Readiness / Road to Response:

- Command Relationships
- Training Conflicts
- Conference Conflicts
- JTF-CS Assumes Authority once in JOA

Road to Readiness

Standard Force Generation Cycle

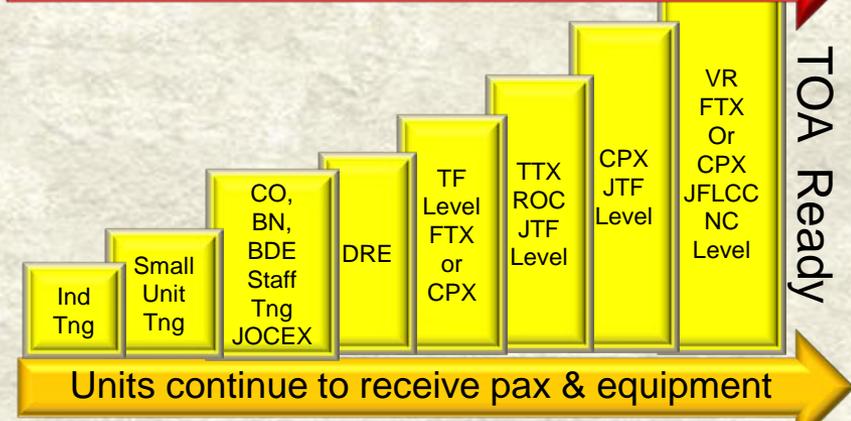

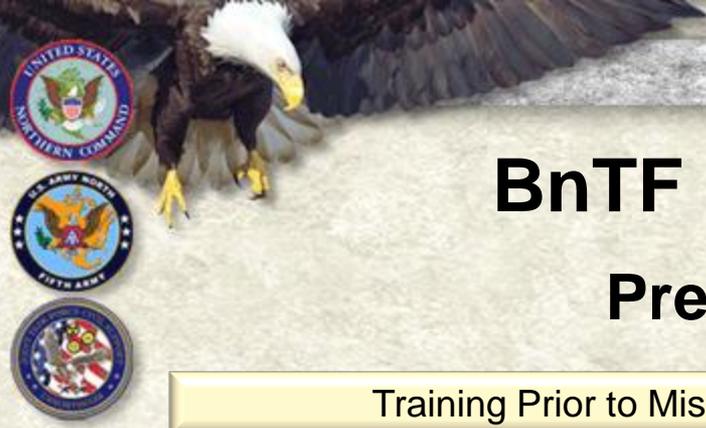

DCRF Force Generation Cycle

Compressed Cycle

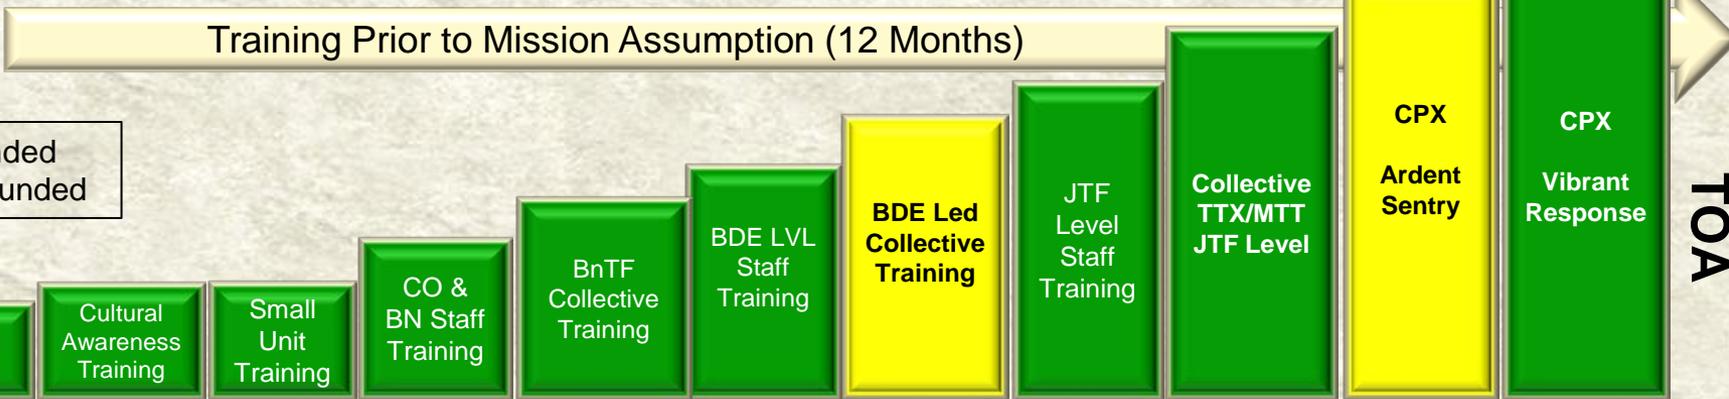

- Forces not identified early enough
- Not enough time to conduct training events
- Unpredictable results
- Little to no time to correct issues

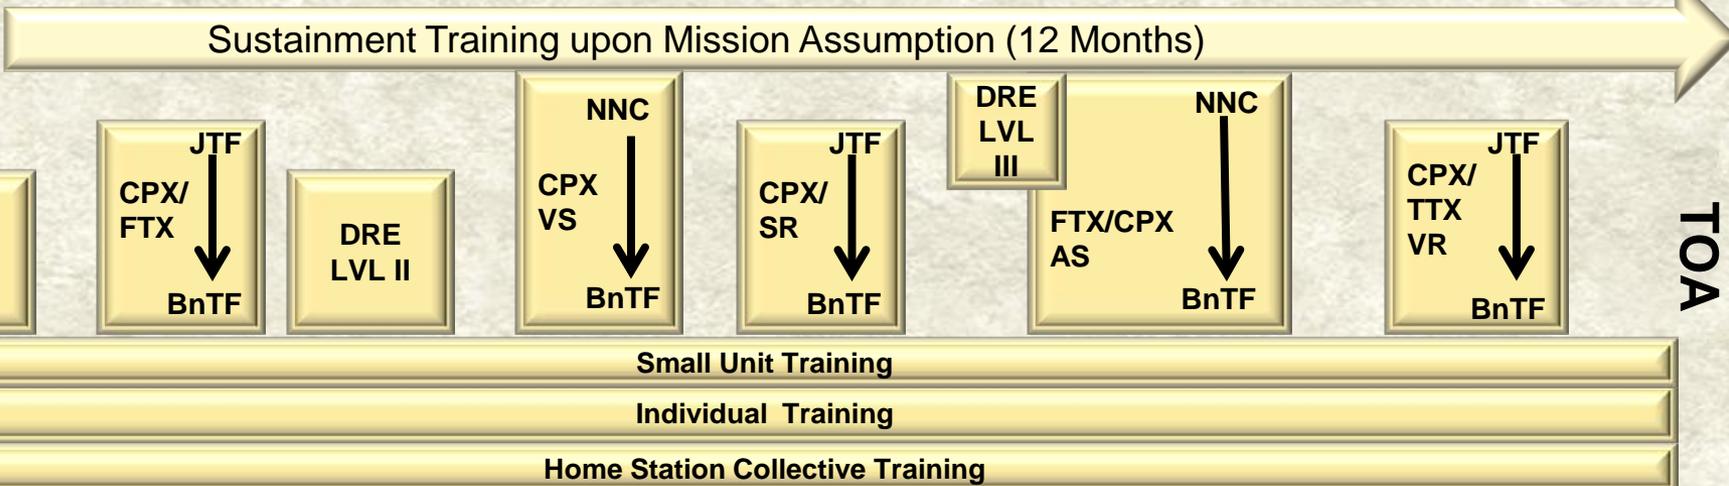

BnTF Collective Training

Pre-Mission Training

■ Funded
■ Unfunded

Sustainment Training (planned FY16 and out)

JTF-CS Imperatives

- 
- A bald eagle is perched on a ledge in the top left corner. Below it are three circular logos: the United States Northern Command logo, the U.S. Army North Fifth Army logo, and the U.S. Army South logo.
- ✓ **Decisive Command & Control**
 - + Enabled expeditionary C3- at the right place, at the right time
 - ✓ **Focused operational HQs and immediate response task forces**
 - + Provides the COCOM with scalable packages where needed
 - ✓ **Meeting Civilian Authorities' Priorities and Objectives**
 - + Full support to the Federal Coordinating Officer
 - ✓ **Operating in all environments**
 - + Operationally effective
 - + Tactically self supporting for 72 hours (with resupply 96 hours)
 - ✓ **External Collaboration and Transparency**
 - + Establish response plans with interagency / whole of community partners

ALWAYS IN SUPPORT OF THE LEAD FEDERAL AGENCY

Summary

- **JTF-CS HQ is a standing joint operational headquarters tasked to plan and integrate DOD forces in response to domestic CBRN incidents**
- **JTF-CS and the DCRF are prepared to respond to a DSCA (CBRN) event in the U.S. as part of the Federal response in support of state/local authorities**
- **The DCRF is organized into three immediate response forces capable of conducting five core competencies: 1) Identification and Detection; 2) Technical and Non-technical Search and Extraction; 3) Mass Casualty and Non-Casualty Decontamination; 4) Medical Triage and Stabilization; and 5) Air and Ground Evacuation (Medical and Non-medical)**
- **JTF-CS and the DCRF are NORTHCOM's and SECDEF's ready standing task force prepared to respond to a no-notice CBRN incident.**
